Your statements may go to your cultural background, partnership status, roles you occupy in life, beliefs, traits that define you etc. eg I am Singaporean, I am from a rural background, I am a fan of Salukis or rap music, I am a vegetarian

- I am Canadian
- I am an engineer
- I am from a small town
- I am a leader
- I am dedicated
- I am a doer
- I am a music lover
- I am a scuba diver
- I am a BJJ practitioner
- I am a problem solver

Looking at these statements, please circle the 2-3 items that you consider to be the most integral to who you are at this moment.

What are three things that are important to you? They could be small eg my coffee in the morning, or large eg world peace.

1. Meaning in work
2. Challenge / interest
3. People focus

What is your favourite animal species and why? \_\_\_\_\_

Cats, they have personality but also independence

## What brings you here?

When did you decide that you wanted to be a vet? Needed meaning in

My work, needed challenge, love of animals, seems fun

What prompted that decision?

I was working at Amazon, wasn't enjoying it.  
Lost my cats of 19 and 18 years. All that combined  
with previous veterinary experience due to my father  
lead me to make the jump.

Take a couple of minutes to imagine yourself 6 years from now. You have completed your DVM, have a job and everything has gone exactly as you hoped. What does your ideal work life look and feel like?

I've moved back home, I'm still working with my father. I'm also preparing to open an emergency clinic in our area. Maybe I'm doing some equine work with Northern Legacy Horse Farm. I hope my girlfriend is with me, maybe we are working on a fixer upper or a new place. On the weekends I fish, sail, do jiu-jitsu, play hockey, work on my garden and side projects. I hope to have several animals to keep us company. I hope I'm respected in the community and people recognize me and my work and my name is the first that comes to mind when people think of a veterinarian.
