

6.8 Roles of a vet in the beef industry

Stuart Barber
Associate Professor

srbarber@unimelb.edu.au

VETS30030 / VETS90123

Veterinary roles

- Clinical vet – beef practice only, mixed practice – some times of year relatively more busy
- Preventive health/production – consulting, management advice e.g. Mackinnon project
- Pharmaceutical industry – research, technical & other
- Government – multiple levels in state, national, international
- RDCs
- Education
- Other

Broad veterinary roles

- Scope to move out of veterinary industry traditional roles and perform other roles with or without relationship to industry
- Veterinary science is a broad based degree
- Half way through theory content for this subject!
